PROFESSIONAL SUMMARY

Building Enterprise Solutions

With more than fourteen years of enterprise software development experience and over five years specializing in Microsoft Dynamics 365 Finance & Operations, I have successfully designed, developed and supported scalable ERP solutions for financial operations, enterprise integrations and business process automation.

My experience combines strong technical expertise with a business-oriented mindset, helping organizations modernize their ERP ecosystem through clean architecture, robust integrations and maintainable solutions.

Core Expertise

- Dynamics 365 Finance & Operations
- X++ Development
- Enterprise ERP Integrations
- Azure DevOps
- REST APIs & OData

- Financial Modules (AR/AP)

Career Journey

2011

Enterprise Software
Development

Started building enterprise business
applications in Android.

Featured Enterprise Project

Enterprise Payment Integration

Microsoft Dynamics 365 Finance & Operations + CenPOS ABI

Designed and implemented a secure enterprise payment integration connecting Microsoft Dynamics 365 Finance & Operations with the CenPOS ABI payment gateway.

The solution automated payment processing, synchronized transactions, updated Sales Orders, Rental Contracts and Service Calls while maintaining financial integrity throughout the ERP platform.

Professional Philosophy

"I believe technology should simplify business processes, empower people, and create long-term value. My goal is not only to develop

*software but to build reliable enterprise solutions that organizations
can trust."*

Let's Build Something Great Together

I am always interested in discussing new Microsoft Dynamics 365 Finance & Operations opportunities, enterprise projects and innovative business solutions.
