EDUCATION

College, location

Technology Degree in Systems

Institución Universitaria Antonio José Camacho

Jan 2008 – Dec 2011

Colombia

PROFESSIONAL SUMMARY

Senior Dynamics 365 Finance & Operations Developer with 5+ years of hands-on experience in D365 and over 14 years of enterprise software development experience. Specialized in financial systems, posting frameworks, and integrations within high-volume transactional environments. Experienced in implementing and customizing financial processes such as Accounts Payable (AP), Accounts Receivable (AR), journal creation, and financial dimensions. Strong background in enterprise integrations and payment systems, including POS platforms and banking transaction processing. Skilled in debugging complex issues, performing root cause analysis, and delivering reliable solutions within enterprise ERP environments.

PROFESSIONAL EXPERIENCE

Senior D365 Finance & Operations Developer

2020 - 2026

Elavon | CenPOS

- Design and implement customizations in Dynamics 365 Finance & Operations using X++.
- Develop financial process logic for posting frameworks ensuring accurate financial transactions.
- Configure journal creation processes and financial dimension assignments.
- Build integrations between D365 and external systems using APIs and Data Entities.
- Perform debugging and root cause analysis of financial transaction issues.
- Support implementation and enhancement of financial modules in enterprise environments.

Android / Payment Systems Developer

2011 - 2020

CenPOS

- Developed Android POS applications integrated with banking systems for electronic payment processing.
- Integrated payment terminals including Ingenico devices and ID TECH card readers.
- Implemented transaction processing through CenPOS payment gateway using SOAP services.
- Supported EMV, swipe, and contactless payment transactions.
- Built middleware and APIs connecting mobile POS systems with backend financial systems.

SKILLS

- Microsoft Dynamics AX
- Visual Studio
- Extensions
- Event Handlers
- Custom Services
- Batch Framework
- Data Entities
- Security Roles & Privileges
- Workflow Development

ERP Functional Knowledge:

- General Ledger (GL)
- Accounts Receivable (AR)
- Accounts Payable (AP)
- Rental Contract
- Service Call
- Sales Order Processing
- Purchase Order Processing
- Inventory Management
- Financial Posting
- Customer & Vendor Transactions
- Cash Discount
- Financial Dimensions

Integration Technologies:

- REST APIs
- SOAP Web Services
- JSON
- XML
- Azure Service Bus
- Electronic Payment Integrations
- External ERP Integrations
- Third-party System Integrations
- Data Exchange
- Custom Services

Microsoft Technologies:

- Azure DevOps
- SQL Server
- T-SQL
- X++
- C#
- .NET Framework
- Git
- Version Control

Development Practices:

- Object-Oriented Programming (OOP)
- SOLID Principles
- Design Patterns
- Code Review
- Performance Optimization
- Debugging & Troubleshooting
- Unit Testing
- Functional Testing Support
- Production Support

AI & Productivity Tools:

- ChatGPT and Copilot
- Analysis
- Technical Documentation
- Productivity Automation

Methodologies:

- Agile (Scrum)
- Azure DevOps Boards
- Sprint Planning
- Backlog Management
- User Stories
- Bug Tracking

Programming Languages:

- X++
- Java
- SQL
- C#

Additional Technical Knowledge:

- JavaScript
- HTML
- CSS
- T-SQL

Additional Development Experience:

- Android Development
- Java
- Mobile Application Development
